1. Questions regarding name tags. The Georgia Composite Medical Board (“Board”) has taken the position that an advanced practice nurse (APRN) or physician assistant (PA) cannot use the title “doctor” in a clinical setting. This position ensures that patients in a clinical setting understand and are not confused by which professional is providing treatment to such patients. The Board supports using the name and degree title on the name tag or lab coat in a clinical setting. The Board maintains that the use of the title “doctor” is protected by O.C.G.A. Section 43-34-21.
2. Kevin Mahoney requested information on regulations concerning administering Lidocaine topical to decrease pain during tattooing. Board advised that he can purchase 5% or less over the counter, but anything over 5% requires a prescription.
3. Michael Schoenfel requested interpretation of drug screening requirement. Send a copy of the Rules and FAQs.
4. Deborah Lindsay, RN asked if algorithms require a MD signature. Board advised there has been no change in the law. Administration of medication to a patient in order to address a medical condition must be ordered by someone with prescriptive authority, appropriate documentation must be maintained.
5. Email from the Federation of State Medical Board concerning “Interstate Medical Licensure Compact Established with Seventh State Enactment; Formation of Compact Commission Triggered.” For information only.
