LaSharn, Hughes Executive Director presented an internal analysis of the Medical Board's strengths, weaknesses, opportunities, and threats. In conclusion the Medical Board is fully engaged and involved with the health care of the citizens in Georgia. The Board does much more than just license and discipline doctors. We establish standards of practice to protect the public from harm, especially as health care becomes more mobile and technology based, and educate doctors about changes that affect the way they practice medicine. The role of the medical boards has never been more important. We must be responsive to change, prepared and actively seeking ways to improve our mission.
