primary practice address in Georgia or within 50 miles of where the Nurse Protocol Agreement will be utilized. Where the protocol is utilized is the physical location of the patient at the time that the services are rendered.

(II) A physician that is physically present in the state of Georgia can collaborate with nurse practitioners in various states across the country provided that APRN is also appropriately licensed to practice in Georgia.

- Correspondence from Anjali Grandhige regarding prescription of schedule II drugs for patients seen by palliative care and the requirement for a physician to “evaluate or examine” patients.

- Correspondence from Jessa Boubker regarding supervision and delegation requirements for PAs and APRNs.

RESPONSE:

(I) Clarification required, please provide clarity on which patient population is being referred to.

(II) No response from this Committee.

(III) Yes. A Physician may list their home address as their principal practice address however, you must be made aware that the listed address will be made public. If a home address is a practice address, it is not protected from open record disclosure.

(IV) Clarification required for each individual procedure and injection.
