NURSE PROTOCOL ADVISORY COMMITTEE

Dr. Norman presented the Nurse Protocol Report:

The Board took the following actions:

The Committee recommended the following:

1. I need clarification on whether PAs and APRNs can supervise CT and MRI with contrast. Answer: Not an issue as long as it is approved by the physician, with a protocol or job description.
2. Is it possible for a GA licensed MD who lives outside of GA (like NY) to supervise GA licensed nurse practitioners (who also live outside of GA) who are practicing via telemedicine? Answer: The physician has to be in Georgia or within in 50 miles of where the protocol agreement is being used.
3. My question is that we have a NP-C with a Delegating Physician as well as a Designated Physician. Does the Designated physician have to “physically” see the patient on these Class III-V

Georgia Composite Medical Board Minutes of the April 1, 2021 Meeting

medications? Does the Delegating Physician have to "physically" see the patient on these class of medications on at least a quarterly basis or is the MD reviewing and signing off on the charts is sufficient? Answer: They must physically see the patient.-Refer to the rules.

4. Section **3708** of the **Cares Act** allows a Medicare -eligible home health patient to be under the care of a NP, PA, CNS who is working in accordance with state law. These changes were effective March 1, 2020. Medicare allowed these changes for social distancing and timely attention to home bound needs. These changes have nothing to do with pharmaceutical change. Only those advance practice providers with NPI and DEA In the Medical composite state board I ask that definition of treatment include Home **health services start of care by certification by NP, PA and recertification as medically necessary per Medicare definition of home bound patients.** Answer: There is not a law prohibiting nor granting. If the information is provided in the protocol agreement or the job description to order home health.
5. If a radiologist who moonlights as an urgent care physician can be the delegating physician for APRNs practicing in the same clinic? Answer: If the physician is functioning as an Emergency MD then yes, if the physician is doing radiology, then no.
6. I know there are many RNs in Georgia practicing aesthetics. I need to know who has implemented the regulations for their practice, or where to find this information? Answer: The CRNA would need an NP license in GA and a protocol agreement.
