NURSE PROTOCOL ADVISORY COMMITTEE

Dr. DeLoach presented the Nurse Protocol Report:

The Board took the following actions:

1. Does the Georgia Board of Nursing have telemedicine laws/protocols for practices that don't have a physical location and provide patient care via telemedicine? How can APRNs practice via telehealth/telemedicine when a physician practice does not exist like the hospital, clinic, or a traditional office setting? How do other out-of-state providers/groups practice in Georgia via telehealth/telemedicine? **The home where telemedicine will be practiced can be listed on the agreement. The physician must be practicing medicine**

Georgia Composite Medical Board Minutes of the July 1, 2021 Meeting

in the state of Georgia or outside of the state within fifty miles of where the protocol agreement is being utilized.

2. I am trying to find what is the state laws and regulations regarding IV therapy? **This information can be found on the Secretary of State website under hydration laws. An NP must submit a protocol agreement to the Medical Board.**
3. A delegating physician (as well as designated physician, if there is one) must be within 50 miles from the APRN's practice site? **Yes, the physicians must be in the state or out of the state but within fifty miles of the location where the protocol will be utilized in the state.**
4. Can a Family Practice Physician delegate or designate acts to a Pediatric Nurse Practitioner or a Family Nurse Practitioner in a pediatric clinic? **Yes, the specialties are comparable.**

In case of APRN owned practices, will having the physician hired under a contract suffice? Are there particular specifications or limitations to consider? **An NP cannot hire a physician who will be supervising them.**

5. As we discussed, my question concerns the following scenario:

When an APRN/CNM in an inpatient, hospital setting orders the administration of a “dangerous drug”, as defined by GA Code Sect. 16-13-71, to a patient admitted to the hospital, is that APRN/CNM required under applicable Georgia Regulations to have 1) a Nurse Protocol Agreement with a responsible physician and 2) a Nurse Protocol Agreement which includes Prescriptive Authority?

To put it another way, under applicable Georgia Regulations, would an APRN/CNM be permitted to order the administration of a “dangerous drug”, as defined by GA Code Sect. 16-13-71, to a patient in a hospital setting 1) without having any Nurse Protocol Agreement with a responsible physician; and/or 2) without having a Nurse Protocol Agreement with Prescriptive Authority?

My second question is: Do applicable Georgia Regulations regarding the authority of an APRN/CNM to issue or write “prescriptions” for medications, including those defined as being a “dangerous drug” pursuant to GA Code Sect. 16-13-71, only pertain to prescriptions written by an APRN/CNM for patients on an outpatient basis (non-hospitalized patients) or do those Regulations also pertain to orders issued by the APRN/CNM for the administration of such medications to a patient in a hospital setting, i.e., when the patient is hospitalized?

To put it another way, is any distinction made in the Regulations between a APRN/CNM “writing a Prescription” for a “Dangerous Drug” and “Issuing an Order” for a patient to be administered a “Dangerous Drug”?

Finally, as far as the scope of the applicable Georgia Regulations are concerned on these issues – including those identified above - is there any difference between those Regulations current in effect and those that were in effect in the year 2016? In other words, were the

Georgia Composite Medical Board Minutes of the July 1, 2021 Meeting

Regulations on these topics - - the authority of an APRN/CNM to prescribe and/or order medications without entering into a Nurse Protocol Agreement with any responsible physician and/or without being granted prescriptive authority - - the same in 2016 they are currently. If not, I'd appreciate your identifying any substantive differences. **This question was tabled.**

6. Question regarding the 50-mile rule and the number of NP's that a physician can supervise when the NP's fall under an exemption-is the limit eight or is there no cap since the NP's don't count towards the limit? **The maximum number of NP's a physician can supervise when they fall under an exemption is eight.**
7. Does GA view it as a violation if a GA MD supervises 4 Full-time nurse practitioners practicing in GA and a few nurse practitioners in other surrounding states in compliance with that state's supervision laws as well? The services is solo primary care practices, the physician would be only acting as a supervising physician (no longer in private practice). The physician has a compact license allowing him to practice in multiple states.

Does GA view it as a violation if a GA MD supervises 4 fulltime APRNs and 4 Pas practicing in GA and additional APRNs/PA in other surrounding states in compliance with that states supervision laws? **Yes, the physician would be in violation of the Georgia law. The limit is fur NP's.**

8. A "delegating physician" is defined at reviewing Ga. Code Ann. § 43-34-25(a)(12) merely as a physician who has entered into a nurse protocol agreement. In the regulation, at Ga. Comp. R. and Regs. 360-32-.01(11), a delegating physician is defined as a physician who (a) *practices medicine in the State of Georgia*; and (b) authorizes an APRN to perform certain delegated medical acts pursuant to a nurse protocol agreement. The definition in the regulation, when read in conjunction with the definition of "physician," which is consistent between the Code and the Rules as it would apply to an out-of-state physician licensed in Georgia, seems to imply that the delegating physician must be engaged in the practice of medicine in Georgia and not merely licensed in Georgia. Is that the case? **Yes, the physician must be practicing in Georgia.**

The definition of "physician" in both the Code and Rule states that the physician's principal place of practice is within the State of Georgia or is *outside the State of Georgia but is within 50 miles from the location where the nurse protocol agreement is being utilized within the State of Georgia*. How is the 50-mile geographic limitation measured in the case of a home health agency or home-based hospice? Is it measured from the patient's home or the HHA or hospice agency office? **The distance is measured from the home-based hospice to the physician's primary practice address.**

The rule, at Ga. Comp. R. and Regs. 360-32-.04(4), states that a delegating physician may not enter into a nurse protocol agreement with more than four APRN's at any one time. A delegating physician meeting the provisions of Code section 43-34-25 (g.1) or (g.2), may enter into a nurse protocol agreement not with more than eight APRNs at any one time, but may only supervise up to four APRNs at any one time. **How do these limitations apply in the case of a so-called back up delegating physician? In other words, assuming that**

Georgia Composite Medical Board Minutes of the July 1, 2021 Meeting

the provisions of Code section 43-34-25 (g.1) or (g.2) do not apply, if a physician agrees to serve as a backup, does that count toward the limit of four, even if the backup physician is not actively supervising any other APRNs? I am just trying to get a handle on the Board's interpretation of these requirements, so any help you can provide me would be most appreciated. This question was referred to the Attorney General's office.

9. Melanie Lieblang's file- Mrs. LaSharn Hughes- **The file was denied because the physician must be practicing medicine in the state of Georgia.**
