**NURSE PROTOCOL ADVISORY COMMITTEE**

Dr. Gross presented the Nurse Protocol Report:

The Board took the following actions:

1. Recently providers Randall Nelson, Topaz Spivey and Gena Peterson were denied for no training, education or certification in Psych. The applications had a Competency Letter and Psych NP-PA Training Objectives attached with their applications. Providers Randall Forehand NPI# 1407385032 and Natasha Garritson NPI# 1861994113 were approved and they both had the Competency Letter and Psych NP-PA Training Objectives attached.
with their applications. Can you please advise? These files will be pulled and reviewed by Dr. Gross on Thursday.

2. 1. Sonography – does the committee consider it an x-ray? Yes, but sonography is acceptable as long as the NP isn’t reading the results.
   2. Signatures on the protocol agreement – shouldn’t it be original? If so, can the original signature come from the “Designated Physician” and not the delegating. Electronic signatures are acceptable, but the delegating physician must sign.

3. Concerns about the protocols that are approved to work with psychiatrist and the national standard for this type of practice. [APRN Scope of practice attachment is uploaded on confluence]. The requirements for a NP to work under a delegating physician that practices psychiatry is that one must have at least one year of clinical experience, a semester of coursework in psychiatry or one’s certification must corresponds to the delegating physician.

4. I am hoping you can help me with some research. There is new verbiage on the Nurse Protocol Agreement that was revised Sept 2019 regarding Form C. This form pertains to the procedures performed by the APRN which are not within competency of their certification specialty. Do you have a list of the procedures that are within competency for each specialty? In order for us to adequately answer the question, I need to find out what procedures qualify. I am not having luck contacting the boards directly. Procedures that are not within the competency of an APRN are procedures that are not mastered in APRN school. Although we do not provide a specific list of procedures, only the procedures that was learned while in school are within the scope of practice of an NP.

5. I am credentialing a NP for a Student Health clinic. She is certified with NCC as a Women’s Health Care Nurse Practitioner. She is asking for Special Privileges which are: Vulvar Biopsy, Colposcopy and Skin Biopsy. I asked her to complete Form C for the GA Medical Board to approve these privileges and she told me she did not need to complete Form C because it’s within her scope of practice. She has not provided any documentation of perform these procedures. Please let me know if she needs to complete Form C. I have asked her for documentation of these procedures because I know the department Chair will want to see something. Form C will need to be completed because these procedures are considered special privileges. Certifications in these areas would also suffice.

Form C:
- Chapman, Vickie-Approved
- Goble, Anne-Marie-First set approved; logs needed for Close reductions and trigger point procedures.
- Hooper, Tracy-Approved
The Committee reviewed and approved the following protocols under the provision of O.C.C.A. 43-34-25.
