Georgia Composite Medical Board Minutes of the June 4, 2020 Meeting

NURSE PROTOCOL ADVISORY COMMITTEE

Dr. Gross presented the Nurse Protocol Report:

The Board took the following actions:

1. A question regarding refilling-controlled substances, if patients are getting refills that require my DEA (such as phentermine, etc.), are there physical assessment requirements? **Yes. Refer to Rule 360-2-7. The Delegating is also required.**
2. Brandi Miller, Pediatric acute care Nurse Practitioner. I am very interested in doing some telemedicine health during these most uncertain times. Initially GA required providers to have an in-person encounter with a physical examination prior to being allowed to assess and prescribe medication electronically. Would I be able to have telemedicine visits while here in Georgia to patient's in New York? What documentation is needed through the State of Georgia to get started? **Refer to telehealth rule. NP needs to contact other states. Needs a license for each state and some states required you to both RN and Advance Practice License. The General Rule is you need license in other states.**
3. Since I have a GA Nurse Practitioner Licensure does this permit me to do Telemedicine from GA but treating patients in different states via phone or live video specifically and only for Workers Compensation in Occupational Medicine? Is there anything else in relation to my licensure that I need to have to practice? **Need to contact other state boards.**
4. The physicians that we need to add as designated are general surgeons and the delegating physician is a Gastroenterologist. They will be utilizing the midlevel for procedures that are within both specialties' scope of practice. May we utilize the general surgeons as designated physicians' or does a new protocol have to be issued? **As long as both Physicians are within scope of the APRN.**
5. The Department of Correctional Healthcare does not require NPs to have DEA since they do not prescribe independently but we have physicians sign off their prescriptions and for that reason our NPs do not file APRN agreement for approval with the medical board. Does this still limit the number of NPs a physician can supervise? **The ratio number is still the same.**
6. The questions are as follows: 1) Since I have a GA Nurse Practitioner Licensure does this permit me to do Telemedicine from GA but treating patients in different states via phone or live video specifically and only for Workers Compensation in Occupational Medicine? For Workers Comp we DO NOT treat patients in Group Health meaning NO Medicaid/ Medicare patients or any other commercial grade health entities. I mention this because it is thought by the physicians and companies employing us that because it is specifically Workers Compensation, we do not require additional Licensure for those States. For example, If I am in Georgia doing Telemedicine and a patient call from Virginia, am I able to treat that patient without a Virginia NP Licensure? Please elaborate. **Must contact other state board.** 2) If my delegating and designated physician have unencumbered license and can practice in any State does that allow me as an NP to also practice in any state without obtaining my NP licensure from those states? **Contact other Boards for their requirements.** 3) If I am employed as an Independent Contractor for Telemedicine can I use the physicians hiring me as my Delegating and Designated physicians? Or do I have to find a different Delegating and Designated Physician outside of that agreement? Is there anything else in relation to

Georgia Composite Medical Board

Minutes of the June 4, 2020 Meeting

my licensure that I need to have to practice as an Independent Contractor? **Must practice in the same scope as physician**
