Physician's Assistant

Tom Bauer, Lobbyist for the PA Association, met with the Committee to suggest changes to the PA Act. The following changes were considered:

Code Section 43-34-26.1 (now 43-34-22.1) – Since the PA Act was amended by the General Assembly with a definition of “job description.” Cross-refer to the new definition in the PA Act.

This section also repeats the definition of “order,” which includes language that “ordering” is not “prescribing,” which can only be done by a physician. The retention of this language is inconsistent with the suggested change in new 43-34-22.1, which removes the prohibition of a PA being issued a DEA number. As is well known, PA’s are indeed issued DEA numbers. This is, or course, subsequent to a December 28, 2002, Georgia Attorney General’s opinion that states: “a physician’s assistant may prescribe Schedule III, IV, and V controlled substances when acting under the requisite supervision of a physician, thereby permitting them to have a DEA number.”

In light of this official opinion and the reality that in many instances physicians are delegating this prescriptive authority under supervision to PA’s it would not only be contrary to existing law, but also a very confusing later expression of legislative intent to retain that portion of the language contained in the definition of “order.”

Dr. Davis motioned, Dr. Finley seconded, and motion carried to accept the suggested amendments.
